

Snap End Mini-King Spool

- Smooth snap bottom of spool avoids tangling during sewing and keeps the end in place when not in use.
- Thread is wound using crosswind technology similar to European wound spools, enhancing how the thread travels off the spool and overall sewing performance.
- Unique inner channel core spool design helps the spool fit snugly on either horizontal or vertical sewing machine spool pins without the need for an adapter.
- Each spool is labeled with product name, yardage, color name, color number, lot tracking number and bar code.
