Dimensions: 5 1/2" length x 3" width

YKK

How To Shorten a Separating Zipper

1. Determine zipper length needed for project. Note: Zippers should be 3/16" shorter than fabric.
2. Starting at the bottom edge of zipper, measure the determined length and mark tape on left and right of zipper teeth. Be sure to add an extra one (1) inch.
3. Unzip to below mark.
4. Cut each tape individually where marked. (Do not re-zip zipper. You will slide the pull off the zipper).
5. To keep cut edge from fraying and to secure the stop for zipper pull, use a dot of Glue from Hot Glue gun.
6. Zipper is now ready to be inset to fabric opening. Start sewing from the bottom of the zipper. When you reach the top cut edge, fold the extra one (1) inch back and tuck into the seam.
